Test Sample Description

- A separate test sample description must be completed for each variable of a product and/or package tested.
- Identical packaged-products with variations such as color or flavor are considered one variable.
- All fields are required to ensure the proper testing sequence is quoted.

- ISTA 6-Amazon.com-SIOC testing requires that samples are tested in the most stable orientation. The most stable orientation may be different than the intended shipping orientation.
- Packaged-products will be tested with the **largest face down**. Package Types D, E & H may have exceptions.

Amazon Standard Identification Number (ASIN): _____ Not assigned
